Appl. No.: 10/693,154
Reply to Office Action of dated April 8, 2005

Indeed, while the Examiner alleges that "[i]t would have been an obvious matter of design choice to modify the bracket in order that its 6 inches above the rear portion of the seat of the chair," the Examiner has not provided any objective teaching in support of this allegation. The absence of such a teaching renders this rejection defective. *In re Rouffet*, 149 F.3d 1350, 1355, 47 USPQ2d 1453 (Fed. Cir. 1998). *See also, In re Beattie*, 974 F.2d 1309, 1311, 24 USPQ2d 1040 (Fed. Cir. 1992). For this reason alone, this rejection must be reversed.

Moreover, if the armrest bracket of the Swenson *et al.* reference were moved to a position 6 inches above the rear portion of the seat of the chair, it would be at, or above, knob 70. In such a position, presumably bar 500 would be approximately parallel to the seat. However, armrest body 30 would be substantially perpendicular to the seat and substantially useless as an armrest. *See Fig. 2 of the Swenson et al. reference.* Therefore, even if there were a motivation to move the armrest bracket of the Swenson *et al.* reference (which there is not), the result would not render the subject matter of Claims 11 and 12 obvious.

It is not believed that extensions of time are required. However, in the event that additional extensions of time are necessary to allow consideration of this paper, such extensions are hereby petitioned under 37 CFR § 1.136(a), and any fee required therefore (including fees for addition of claims) is hereby authorized to be charged to Deposit Account No. 16-0605.

The present paper presents two (2) additional claims, but with the additional claims, the total number of claims remains less than twenty (20). Thus, it is believed that this communication does not occasion any additional total claim fees.

However, the amendment adds one independent claim which occasions an additional independent claim fee.
